

KEISER STRENGTH

A350 BIAXIAL UPPER BACK

Model 2035

UPPER BODY MACHINES

UPPER BACK SYMMETRY

Specifically designed to isolate the upper back, this Biaxial Upper Back is unlike anything else. It forces you through a range of motion that optimizes the effect on all of the muscles of the upper back. Unilateral movement promotes symmetry by preventing the strong side from helping the weaker side. Since the muscles of the back are one of the largest muscle groups in the body and this machine is focused specifically on the upper muscles, the Keiser Lat Pull Down is a great adjunct for complete training of this all-important muscle group.

KEISER DYNAMIC VARIABLE RESISTANCE

Keiser's **Dynamic Variable Resistance** is designed to provide a smooth consistent Variable Resistance force curve at any training speed. Each machine has its own unique Variable Resistance curve designed and tuned perfectly for the muscles being used in that particular exercise. For users, this means that working out any speed, you'll always be training at maximum efficiency.

FEATURES

- Unique axis of rotation allows greater range of motion in natural planes of movement
- Smooth Keiser **Dynamic Variable Resistance**
- Fully adjustable to accommodate a wide range of users
- Durable construction engineered for years of use
- Large digital display with resistance and counted repetitions

SPECIFICATIONS

HEIGHT: 63" / 1600 mm

WIDTH: 51" / 1296 mm

DEPTH: 48" / 1219 mm

WEIGHT: 240 lbs / 109 kg

RESISTANCE RANGE:

0 - 350 lbs / 0 - 159 kg
